

IN THE CLAIMS:

Please amend the claims as follows.

1-14. (Cancelled)

15. (Previously Presented) A safety plug, comprising:

- a body having a first end adapted to be inserted into a power port;
- a locking device connected to the body for reversibly engaging an inside of the power port;
- a control device operatively coupled to the locking device for disengaging the locking device from the inside of the power port,
- at least one electrical contact on the first end of the body for conducting electricity from the power port; and
- an electrical device disposed proximate to a second end of the body and electrically connected to the at least one electrical contact, wherein the electrical device is configured to be powered by the electricity from the power port,
- wherein the control device comprises a child-resistant mechanism,
- wherein the electrical device is attached to a second end of the control device.

16. (Cancelled)
